WORDPRESS MANAGED HOSTING

Still updating your WordPress website in your spare time?

Managing a busy website can be a full-time job. It shouldn't be **your** job. Wintercorn provides technical support, maintenance and proactive managed hosting for WordPress sites of every size.

12 min	300+	<50	24/7
fastest full site restore	integrity checks on files, templates and plugins	sites per server, by design	real-time monitoring

Everything handled, so you don't have to

Free migration
We move your site(s) and set them up correctly.

Free SSL
You'll never have to worry about expired certificates again.

Core, plugin and theme updates
WordPress core, plugins and themes kept current. Major releases tested on our development platform first.

Daily off-site backups
Plus on-demand local and remote backups from your site admin.

30 minutes of support a month
Use it for content updates, new features or trying a new design.

Quarterly activity report
See exactly what's been updated and backed up.

Why not bulk shared hosting?

Shared hosting can be a prime attack vector, with thousands of poorly secured, out-of-date sites on one server. AI-powered hacking is also hitting websites that used to be safe.

The Wintercorn difference

- Every client known, no automated signups
- Sites audited before going live
- Hourly change monitoring
